

Motivation

The Digital Twin as a Service (DTaaS) software shall be used for creating a Digital Twin support platform for SMEs. The documentation and a research paper draft are available in [docs/](#) directory.

Installation

The best way to use the DTaaS software is via a vagrant virtual machine. The install instructions in [deploy/vagrant/single-machine/README.pdf](#) should help you get started. If you face any issues, please open an [issue](#).

Directory Structure

Directory	Contents
client	Code files for building and hosting web client
deploy	Vagrant scripts for creating vagrant boxes and deploying DTaaS on a single vagrant virtual machine
docs	Top-level project documentation
files	Directories used for serving the user files. This installation has one user named user1
servers	Contains configuration files for Traefik gateway

License

This software is owned by [The INTO-CPS Association](#) and is available under [the INTO-CPS License](#).
